INTEGRATIVE CAD/CAM SOFTWARE

Dolphins are widely considered to be the most intelligent and responsive animals. And dolphins are highly innovative as well, using their superior intelligence to smoothly adapt to new situations and environments.

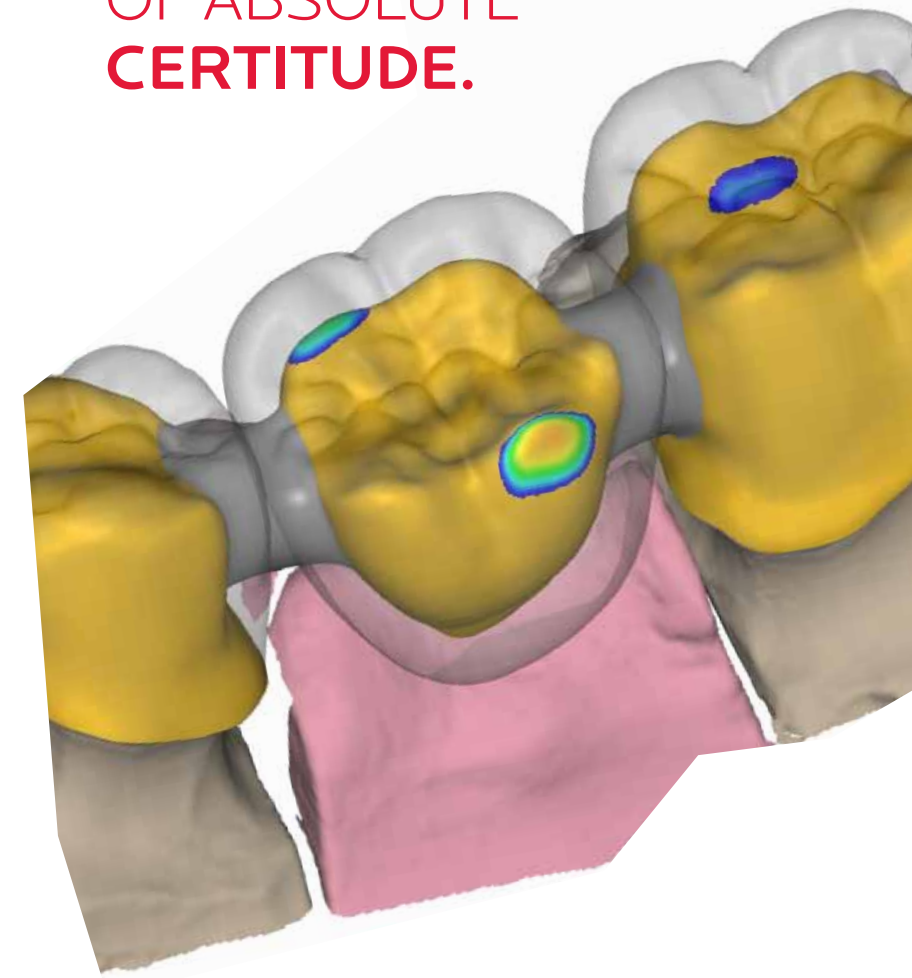

ORCA CERTITUDE IS THE PERFECT REPRESENTATION OF INTELLIGENCE AND RESPONSIVENESS COMBINED TO FORM A POWERFUL YET INTUITIVE, EASY-TO-USE INTERFACE. IT SMOOTHLY PERFORMS THE INTENSIVE CALCULATIONS NECESSARY TO PRODUCE HIGHLY PRECISE INSTRUCTIONS THAT ABLY CONTROL THE ORCA SYSTEM.

The ORCA Certitude software system provides the user with a seamless, easy-to-use interface that intuitively follows the natural workflow of the design and milling process.

Certitude gives you high-level control at the touch of a button. Designed specifically for the ORCA 5X, the software is fully integrated and works seamlessly as the brain of the highly accurate CNC milling unit.

Certitude handles the entire gamut of dental restorations including crowns, bridges, bites, inlays, onlays, impressions, implants, and undercuts, plus diagnostic wax-ups.

THE GRATIFYING REASSURANCE OF ABSOLUTE CERTITUDE.

Automatic Pre-Nesting

The automated pre-nesting feature mathematically configures optimal placement for the most efficient use of raw materials, and enables up to 35 - 45 restorations to be made from a single blank.

One Click Entry into CertiCAM

Once your design is completed, one click is all it takes to transfer your design into the ORCA's CAM system. There's no need to save your file, close it out, and import it as though it was some foreign or ancient file. That's the beauty of Certitude. It's a seamless software environment that works the way you do
